

Editable Math Escape Room

FOR ANY CONCEPT REVIEW

Four editable tasks:

- Application (easy)
- Comparison (easy)
- Word problems (hard)
- Encrypted message (medium)

The screenshot shows a PowerPoint presentation titled "Starter Escape Room - Math - PowerPoint" by Danielle Hall. The slide is titled "TASK 1: Equations Mix-Up". The instructions state: "Figure out which point is on each line. Follow the correct points. Every letter that you cross will be part of the code word and each symbol will be part of the final secret message. The rest of the symbols may not be correct." The diagram shows a path starting from a box labeled "A = R" with the equation $y = \frac{1}{2}x - 3$, passing through a point $(\frac{1}{2}, 2)$, then to a box labeled "B = B" with the equation $y = 4x + 4$, passing through a point $(2, 0)$, and finally to a box labeled "E". A pink box titled "How to Edit" provides instructions on editing equations and answers.

TASK 1: Equations Mix-Up

Figure out which point is on each line. Follow the correct points. Every letter that you cross will be part of the code word and each symbol will be part of the final secret message. The rest of the symbols may not be correct.

How to Edit

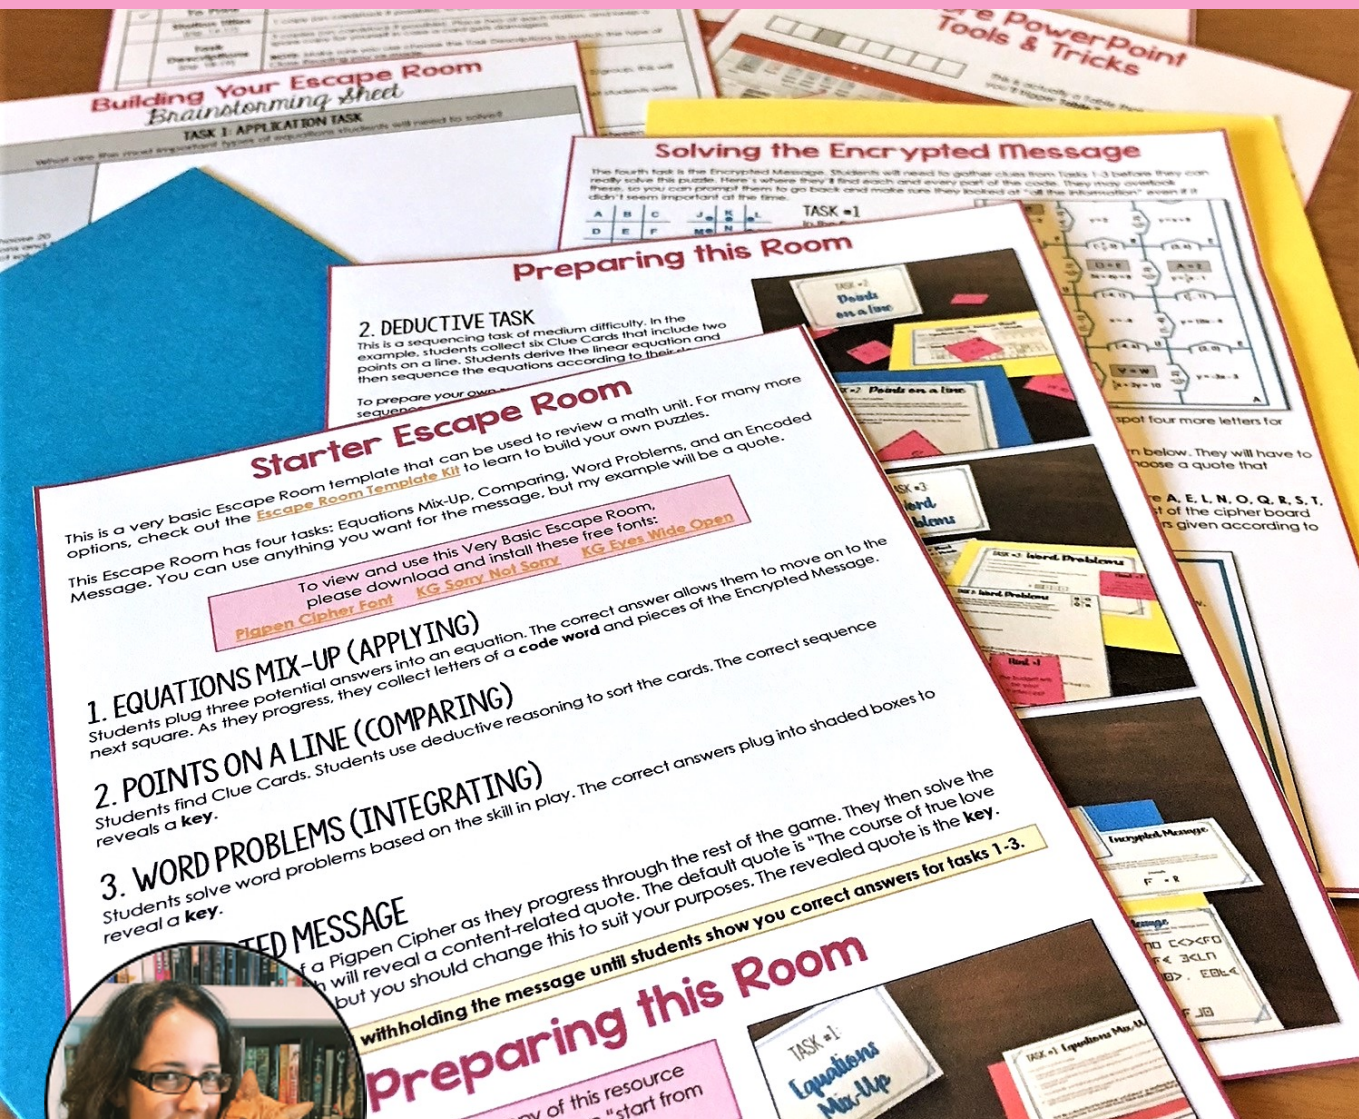

You can edit every equation and potential answer in this Mix-Up. All of the pink boxes need to be correct answers, and this is the path students will take to collect the **code word** and symbols they'll use in Task #4.

1. Currently, the **code word** is FUTURE. You can change this to another five or six letter word.
2. Make sure that you create wrong answers for the other possible paths from each box.

Organized from start to finish:

- Follow the instructions
- Insert your information from any unit into the clue cards
- Print and go!

Includes an intro to editing the resource, a brainstorming sheet, a printing checklist, & editable answer sheet for students

Nouvelle ELA

What other teachers are saying...

SO easy to set up - even for four different texts for four different classes! Easy to fit multiple grade levels as learning levels - honors and regular.

...puts classroom teachers in the driver's seat... the organization part is set up so teachers can focus on content and student success!

This was so easy to use when I know I would have been lost and frustrated on my own!

Super cool. Super relevant. Easily adaptable. Highly rigorous and engaging. Boom. Done. What more could you ask for?
