

# Make Your Own Science Escape Room

**TASK #1: Biome Descriptions MATCHUP**

Your goal is to reveal a code word.  
Sort the cards into the categories on the mat (temperature, precipitation, and biome name on your Answer Sheet, standard shaded boxes will spell out a code word).

**Adaptations**  
Use them to decide which animals are best adapted for life.

**Reading**  
Choose questions about the features of the correct biome for your answer.

**Message**  
Read throughout the game. If you have difficulty solving the message, any clues will help.

**Encrypted Message**  
Using clues that you've found throughout the rest of the room, decode the message below.  
Write the decoded message on your Answer Sheet.

"VΓLJOFQOVV .

>ΠQ VEFJ Γ>VΠΓ

Extreme differences between daytime and nighttime temperatures.

## EDITABLE FOR ANY SCIENCE UNIT

# BUILD AN ESCAPE ROOM

## Using Any Science Unit

### YOUR RESOURCE:

This resource includes detailed instructions and a template to make custom escape rooms to review any unit or concepts in your science classroom throughout the year.

### FOUR TASKS:

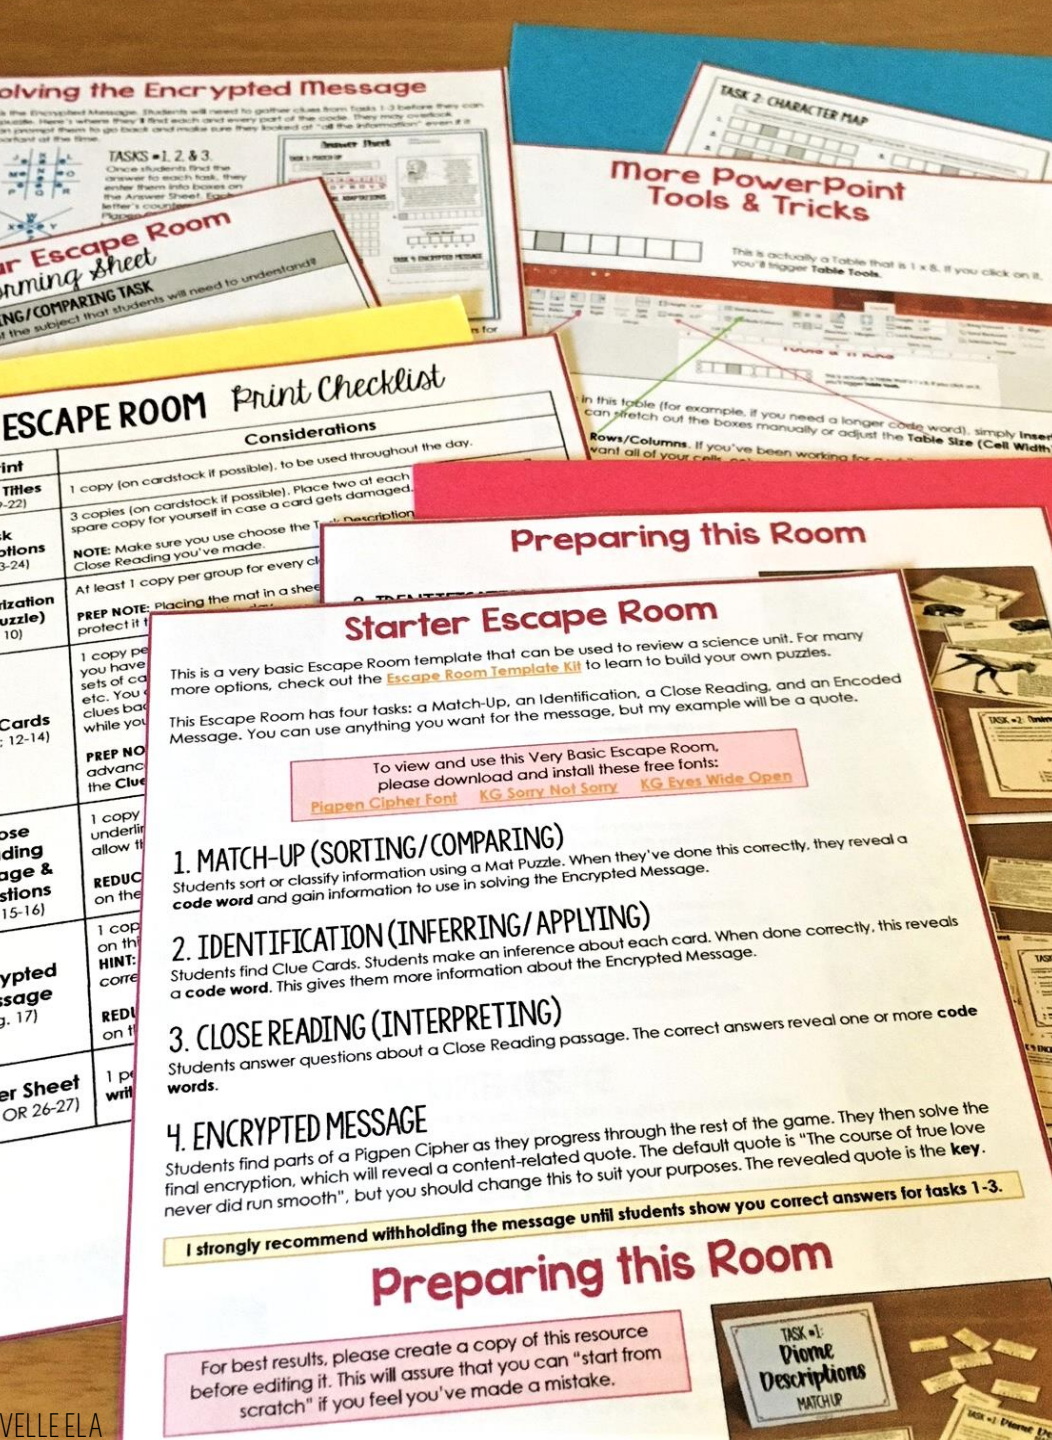

Categorization • (easy)  
Identification • (easy)  
Close Reading • (hard)  
Secret Message • (medium)

### EXTENSION ACTIVITY:

Add rigor by having students respond to the message you choose to encode after they have finished the game!

### EVERYTHING YOU NEED:

Once you've customized your template, the activity can be facilitated as a Breakout Box (students work from their desks) or an Escape Room (students search room for clues) to review any text. This activity does not require additional locks, supplies, or technology.

# What other teachers are saying...

This was so easy to use when I know I would have been lost and frustrated on my own!

Easy edits

Super engaging. Students loved it.

Engaging

...puts classroom teachers in the driver's seat... the organization part is set up so teachers can focus on content and student success!

Complete personalization

So glad to have an editable version! We'll be using these a lot for upcoming state test prep.

Year-round usability

I've been wanting to make an escape room for a long time but didn't know where to begin... Thanks so much!

Great for beginners

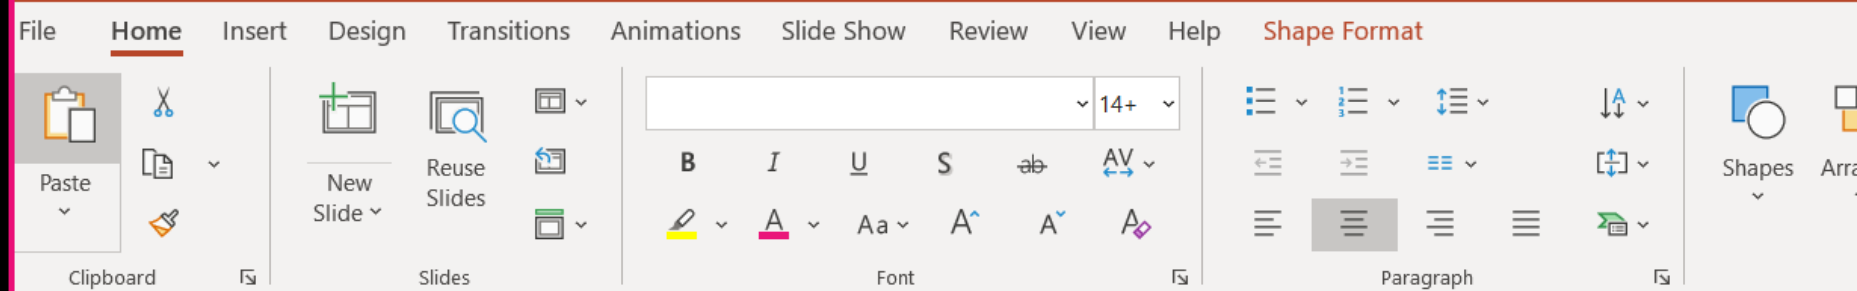

Thanks so much...I will get lots of use out of this for all my different classes!

Differentiation

Super cool. Super relevant. Easily adaptable. Highly rigorous and engaging. Boom. Done. What more could you ask for?

Rigor & relevance

Match Up

TEMPERATURE	PRECIPITATION	BIOME NAME
Extremely cold winters with cool summers.	Most of the annual precipitation comes during the cool summer months.	Receives the least precipitation of any biome on Earth, sometimes going years without rain.
W S Q	R G B	

Clue Cards

Copy each piece of information into the appropriate text box and the correct clue letters into the three-box for each.

(Delete this box)

Extremely cold winters with cool summers.	Most of the annual precipitation comes during the cool summer months.	Receives the least precipitation of any biome on Earth, sometimes going years without rain.
